Preface	4
Welcome	
Chapter 1: Syntax	9
Pattern matching	
Nil coalescing	
Guard	
Lazy loading	
Destructuring	
Labeled statements	
Nested functions, classes and structs	
Documentation markup	
Chapter 2: Types	64
Useful initializers	
Enums	
Arrays	
Sets	
Tuples	
Generics	
Chapter 3: References and Values	102
What's the difference?	
Closures are references	
Why use structs?	
Why use classes?	
Choosing between structs and classes	
Mixing classes and structs	
Immutability	
Chapter 4: Functions	122
Variadic functions	
Operator overloading	
Closures	
The ~= operator	

Chapter 5: Errors	149
Error fundamentals	
Error propagation	
Throwing functions as parameters	
try vs try? vs try!	
Assertions	
Chapter 6: Functional programming	170
What is functional programming?	
map()	
flatMap()	
filter()	
reduce()	
sort()	
Function composition	
Lazy functions	
Functors and monads	
Chapter 7: Patterns	206
Object-oriented programming	
Protocol-oriented programming	
MVC	
MVVM	
Command-line Swift
