Contents

Preface 4
- Welcome

The Basics of Testing 9
- Why test?
- Your first test
- The anatomy of a test
- The testing pyramid
- So what's the problem?

Unit Testing 35
- Organizing unit tests
- Custom setup and teardown
- Control your inputs
- Making assertions
- Handling errors
- Testing the tricky stuff
- Advanced expectations
- Performance testing
- Monitoring tests
- Random and parallel testing

Test Doubles 112
- A little terminology
- Dependency injection
- Interfaces, not implementations
- From protocols to injection
- Where constructor injection fails… and succeeds

Injecting closures
Injecting everything
Coordinators
Dependency injection vs encapsulation
Mocking
Partial mocks vs full mocks
Mocking preconditions and assertions
Mocking networking
Mocking networking: an alternative
What not to mock
Working with test data

User Interface Testing 179
A UI testing primer
Working with queries
Screenshots and attachments
Tips and tricks

Test-Driven Development 204
Why test first?
The basics of TDD
A test-driven case study
Adopting a test-first mentality
