Preface 6

About this book
What's it like to build for watchOS?
A note for iOS and macOS developers

Introduction: Swift for Complete Beginners 13

How to install Xcode and create a playground
Variables and constants
Types of Data
Operators
String Interpolation
Arrays
Dictionaries
Conditional statements
Loops
Switch case
Functions
Optionals
Optional chaining
Enumerations
Structs
Classes
Properties
Static properties and methods
Access control
Polymorphism and typecasting
Closures
Protocols
Extensions
Protocol extensions

Wrap up

Project 1: NoteDictate 170

NoteDictate: Setting up
Defining our data
Working with views
Showing a list of notes
Reading user input
Selecting and deleting notes
NoteDictate: Wrap up

Project 2: Rock, Paper, Scissors 195

Rock, Paper, Scissors: Setting up
Proportional layout
Picking a move
Adding some pressure
Winning the game
Rock, Paper, Scissors: Wrap up

Project 3: Storing data 213

Storing Data: Setting up
Upgrading project 1
Reading and writing user settings
Storing Data: Wrap up

Project 4: WatchFX 222

WatchFX: Setting up
Picking from an array
Cleaning up our layout
Selecting favorite currencies
Making network requests
Supporting the Digital Crown
WatchFX: Wrap up

Project 5: Hue Knows 254

Hue Knows: Setting up
Building the core game
Ending and restarting
Timing notifications for later
Hue Knows: Wrap up

Project 6: Views and Modifiers 275

Views and modifiers: Introduction
Why does SwiftUI use structs for views?
Why modifier order matters
Why does SwiftUI use “some View” for its view type?
Conditional modifiers
Environment modifiers
Views as properties
View composition
Custom modifiers
Views and modifiers: Wrap up

Project 7: Magic 8-Ball 300

Magic 8-Ball: Setting up
The basics of complications
Seeing into the future
Magic 8-Ball: Wrap up

Project 8: Safe Crack 316

Safe Crack: Setting up
Building the basic UI
Twist to win
Ending the game
Safe Crack: Wrap up

Project 9: Animation 330

Animation: Setting up
Creating implicit animations
Customizing animations in SwiftUI
Animating bindings
Creating explicit animations
Showing and hiding views with transitions
Animation: Wrap up

Project 10: iMove 350

iMove: Setting up
Building the user interface
Setting up permissions
Reading live data from HealthKit
Updating our user interface
Handling state changes
iMove: Wrap up

Project 11: ColorSpin 380

ColorSpin: Setting up
Showing a SpriteKit scene
Controlling the player
Creating warning edges
Launching balls
Spin to win!
ColorSpin: Wrap up

Project 12: WatchConnectivity 415

WatchConnectivity: Setting up
A tale of two interfaces
Establishing communication
Sending messages
Sending files
WatchConnectivity: Wrap up
